

Complex Equipment form explained

All boxes will expand to accommodate the required information.

Diagnosis: Only indicate the Diagnosis relevant to this application not all past medical history.

These boxes describe the person, their environment and the issues they are facing. Keep information relevant to the application.

The header line of client and assessor name will automatically repeat on subsequent pages.

Where the 'exact item' is required, the justification for this must be included in the rationale.

Supplier/catalogue number: Where available in Store similar equipment will be provided. This information clarifies the type and style of equipment that is required. Where the item is not available in Store this information is required to purchase the correct item for the client.

The form can be 'unlocked' to allow customised Assessor details.

Primary disability type: These boxes are for reporting purposes. Only one should be selected.

Numbering will automatically change if the report goes over the page.

Please indicate if a trial of the item of equipment is required.

Rationale or justification for the equipment selected must indicate how the equipment will meet the identified needs.

Other options: Indicate the potential solutions which may have been possible, and the reasons why these have been discounted.
